

AT&T NetBond®

Bring the cloud to your network

Commanding the Cloud

Modern businesses use cloud computing to increase agility and flexibility while reducing costs. But relying on the public internet to access the cloud comes with risks. How can you take advantage of the flexibility and efficiency of your cloud applications, without sacrificing the performance and security of a private network?

The answer is AT&T NetBond. Any AireSpring MPLS circuit can securely connect to your cloud providers through AT&T's NetBond service, enhancing the performance of your cloud applications and giving you more control over your cloud resources. Once connected, you can access leading cloud providers like Amazon Web Services, Microsoft Azure, and Google Cloud as if they were a node on your own private network. This is more than a secure connection, this is a "bond" between your AireSpring MPLS network and AT&T's powerful core.

AireSpring's Unique Advantage

AireSpring customers enjoy a unique advantage with NetBond. Since AireSpring's core network is already connected to AT&T's NetBond service, AireSpring customers can access NetBond *without an AT&T circuit*. Any AireSpring MPLS customer connected to AireSpring's network can gain the benefits of NetBond – no matter what other carriers you use on your network.

NetBond allows for an enhanced, secure connection between your AireSpring MPLS network and leading cloud providers.

Benefits

- Connect to all your cloud resources via a private network connection which enhances security and mitigates risks such as DDoS attacks and other cyber threats.
- NetBond gives your IT staff simplified and centralized routing control, while AireSpring handles network monitoring and management.
- Since AireSpring is pre-integrated with AT&T's core, AireSpring MPLS customers don't need additional equipment to access NetBond.

The AireSpring Advantage

Fully Managed Network with QoS

All the features in the world won't make a difference if your communications services are dependent on a public internet connection beyond your control. Even an SLA (service level agreement) cannot ensure or guarantee quality and reliability, or prevent latency across the public internet, which can result in poor call quality and unreliable service. We provide service over our fully managed, owned and operated IP network with end-to-end Quality of Service (QoS) for exceptional voice quality.

Eliminate Finger Pointing Between Providers

By having all services delivered by a single vendor on a fully managed network, you avoid the finger pointing and blame game that occurs when you have cloud communications services delivered by a different vendor than your connectivity.

Largest Available Coverage

From Somerset, CA to Madill, OK to Moravian Falls, NC to New York City, we cover more locations than anyone else on our network.

FREE On-Premises Enterprise-Grade Router/Gateway

We provide a fully managed, enterprise-grade router/gateway to manage VoIP and Data traffic, (available with AireSpring Managed Connectivity).

Reliable and Diversified Network

AireSpring's geo-redundant network provides true network diversity and supports disaster recovery options, helping to ensure business continuity.

Online Access via our AireCare™ Customer Portal

Our advanced online billing reporting portal provides 24/7 access to your billing and service details.

Free 24/7 ProactiveWAN

Network Monitoring Service

AireSpring's Managed Connectivity services include free 24/7 professional monitoring with the AireNMS network monitoring service. Our NOC proactively monitors your network to pinpoint and fix potential problems before they affect your business.

Personalized Service

We back you up with outstanding customer service, featuring one bill and a single point of contact for all your service needs.

Escalation List Up to Our CEO

We stand behind our service 100%! In fact, we're so committed to ensuring complete satisfaction that we provide all of our customers with an escalation list giving you access to our executive management all the way up to our CEO.
