

Multi-Cloud Connect™ Bring the cloud to your network

Commanding the Cloud

Modern businesses use cloud computing to increase agility and flexibility while reducing costs. But relying on the public internet to access the cloud comes with risks. How can you take advantage of the flexibility and efficiency of your cloud applications, without sacrificing the performance and security of a private network?

The answer is Multi-Cloud Connect, enabled by Megaport. Any AireSpring SD-WAN and MPLS circuit, as well as circuits utilizing AireSpring IP, can securely connect to your cloud providers through AireSpring's service, enhancing the performance of your cloud applications.

Once connected, you can access leading cloud providers like Amazon Web Services, Microsoft Azure, and Google Cloud as if they were a node on your own private network.

AireSpring's Unique Advantage

AireSpring customers enjoy a unique advantage with Multi-Cloud Connect. Since AireSpring's core network is already pre-integrated with leading cloud providers, AireSpring customers can access Multi-Cloud Connect without any additional circuit.

Multi-Cloud Connect allows for an enhanced, secure connection between your AireSpring SD-WAN, MPLS or AireSpring IP circuit and leading cloud providers.

BENEFITS

- Connect to all your cloud resources from one single source, via a private network connection which enhances security.
- Since AireSpring is pre-integrated with leading cloud providers, AireSpring SD-WAN and MPLS customers and customers utilizing AireSpring IP don't need additional equipment to access Multi-Cloud Connect.

The AireSpring Advantage™

- **Fully Managed Network with QoS**
All the features in the world won't make a difference if your communications services are dependent on a public internet connection beyond your control. Even a service level agreement (SLA) cannot ensure or guarantee quality and reliability, or prevent latency across the public internet, which can result in poor call quality and unreliable service. We provide service over our fully managed, owned and operated IP network with end-to-end Quality of Service (QoS) for exceptional voice quality.
- **Eliminate Finger Pointing Between Providers**
By having all services delivered by a single vendor on a fully managed network, you avoid the finger pointing and blame game that occurs when cloud communications services are delivered by a different vendor than your connectivity.
- **Largest Available Coverage**
From Somerset, CA to Madill, OK to Moravian Falls, NC to New York City, we cover more locations than anyone else on our network.
- **FREE On-Premises Enterprise-Grade Router/Gateway**
We provide a fully managed, enterprise-grade router/gateway to manage VoIP and Data traffic, (available with AireSpring Managed Connectivity).
- **Reliable and Diversified Network**
AireSpring's geo-redundant network provides true network diversity and supports disaster recovery options, helping to ensure business continuity.
- **Online Access via our AireCare™ Customer Portal**
Our advanced online billing reporting portal provides 24/7 access to your billing and service details.
- **Free 24/7 ProactiveWAN Network Monitoring Service**
AireSpring's Managed Connectivity services include free 24/7 professional monitoring with the AireNMS network monitoring service. Our NOC proactively monitors your network to pinpoint and fix potential problems before they affect your business.
- **Personalized Service**
We back you up with outstanding customer service, featuring one bill and a single point of contact for all your service needs.
- **Escalation List Up to Our CEO**
We stand behind our service 100%! In fact, we're so committed to ensuring complete satisfaction that we provide all of our customers with an escalation list giving you access to our executive management all the way up to our CEO.

AireSpring has received numerous industry awards for "Product of the Year," "Best Telecom Deal," "Members Choice Top Reseller," "Best in Show," and "Top Channel Program."
